Red Raspberry Seed Oil

Rubus ideaus

NatureFRESH-Cold Press

Red raspberry seed oil is a rich source of polyunsaturated fats including omega-3 fatty acids and antioxidant activity, including tocopherols and tocotrienols. Tocopherols are primarily gamma and alpha tocopherol, which contribute to the oil's superior free radical ion scavenging capability and lipid support. This oil is low in saturated fat.

Having a bright gold to reddish color, red raspberry seed oil is valuable for skin applications.
